

Bottom Exhaust System for the SCL800 Leaf Collector

Optional bottom exhaust system re-directs the unit's exhaust to the ground, keeps debris from flying high into the air.

Air is vented through heavy duty mesh screens mounted in the top of the box and then directed to the sides by all steel duct work and is exhausted on to the ground

Directs air to the ground instead of high into the air.

Top of the unit is fully enclosed so debris will not fly overhead

Hinged doors allow easy access to the exhaust screens

Hinged doors allow easy access to the exhaust screens
